I am just jumping on a call now.

I think fred answered my CLP question. I have no idea when HQ will be allowing us to start. Worst case you may get 4 sample sets this Friday. But I am doubt we will be getting the go ahead today, so we may be dead for this week.

Let's talk later today when you get the chance.

Rich

Rich,

Just checking on the status of sampling. I'm planning a call with the other Regional labs sometime today but will hold off until tomorrow (our regularly scheduled monthly call) if sampling is not happening this week.

I'd also like to touch base with you on report deliverables and to answer your questions about specific methods (524 vs. CLP). Right now I have meetings scheduled from 9:30-11 and the EPA Town Hall at 2.

Cindy
